

REMARKS

The claims in the application are now claims 1, 3-17 and new claims 18 and 19.

The Remarks of the Reply After Final Action filed September 20, 2007, are respectfully repeated by reference.

The new claims 18 and 19 are patentable **at least** because they depend from and incorporate the subject matter of claim 1. The basis for the range of 5-25 wt% as called for in new claims 18 and 19 appears on page 19, line 17, to page 20, line 4, of the present specification. The phrase "wherein the soft capsule formulation has an average capsule size of 2mm or less" is based on claim 4 (see the final action at page 4, lines 6 and 7).

Favorable reconsideration is respectfully requested.

Respectfully submitted,

BROWDY AND NEIMARK, P.L.L.C.
